

THE SITE OF 2040 — DRAWN BY _____

Draw your whole site from above — aerial view, ugly drawings only, every zone labelled. The four questions around the edge must all be answered somewhere on your map.

⚡ POWER

What runs this site?
Where does the power
come from — and what
happens at night?

≈ WATER

Where does water come
from? Where does it go
after? Who checks it? (Unit
3 is watching.)

AERIAL VIEW • 2040

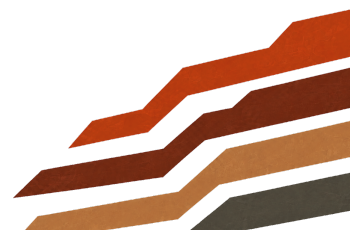

⚙ MACHINES

Who — or what — is
driving? Where are the
robots, and where are
they banned?

👤 PEOPLE

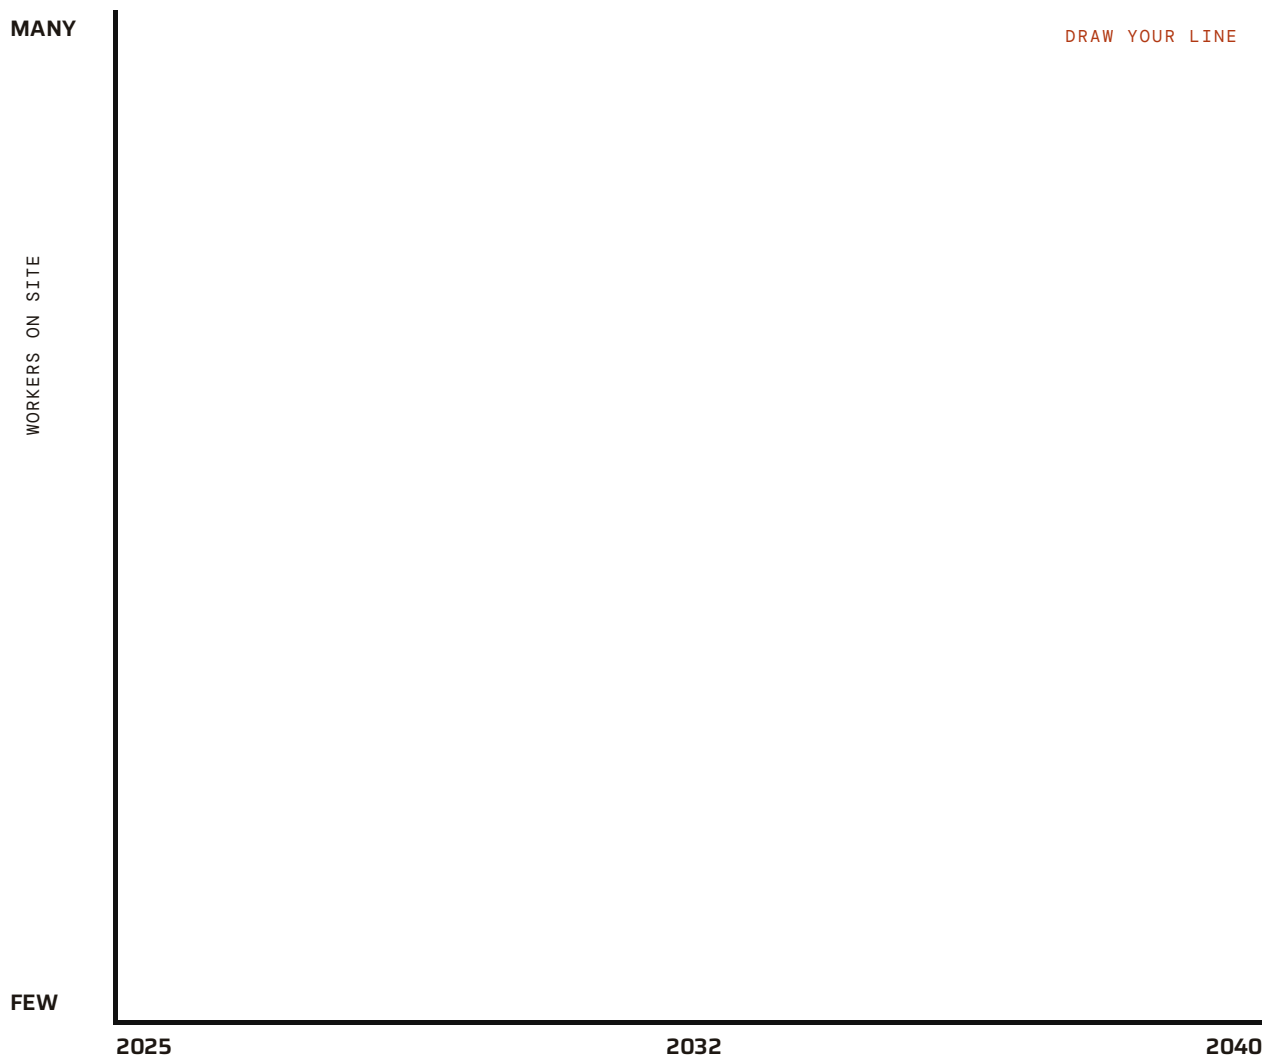

Where are the humans —
on site, in Perth, at home?
Draw where the jobs live.

Tour rule: a map nobody explains is just a doodle. Sixty seconds, every zone named, two “why” questions survived.

THE CURVE — YOUR PREDICTION, GRAPHED

One line, drawn by you: how many workers are ON SITE at a typical big WA mine, from 2025 to 2040. There is no right line — but there are defended lines and undefended lines. Yours will be defended.

My line's shape, in one word: _____ · The reason for the shape (your two-sentence defence, written after you say it):

A job that EXISTS in 2040 because of my line: _____ · A job my line makes RARE:
